this volume investigates a number of issues needed to develop a modular effective versatile cost effective pedagogically embedded user friendly and sustainable online laboratory system that can deliver its true potential in the national and global arenas this allows individual researchers to develop their own modular systems with a level of creativity and innovation while at the same time ensuring continuing growth by separating the responsibility for creating online laboratories from the responsibility for overseeing the students who use them the volume first introduces the reader to several system architectures that have proven successful in many online laboratory settings the following chapters then describe real life experiences in the area of online laboratories from both technological and educational points of view the volume further collects experiences and evidence on the effective use of online labs in the context of a diversity of pedagogical issues it also illustrates successful online laboratories to highlight best practices as case studies and describes the technological design strategies implementation details and classroom activities as well as learning from these developments finally the volume describes the creation and deployment of commercial products tools and services for online laboratory development it also provides an idea about the developments that are on the horizon to support this area

the integration of technology has become an integral part of the educational environment by developing new methods of online learning students can be further aided in reaching goals and effectively solving problems the handbook of research on innovative pedagogies and technologies for online learning in higher education is an authoritative reference source for the latest scholarly research on the implementation of instructional strategies tools and innovations in online learning environments featuring extensive coverage across a range of relevant perspectives and topics such as social constructivism collaborative learning and projects and virtual worlds this publication is ideally designed for academicians practitioners and researchers seeking current research on best methods to effectively incorporate technology into the learning environment

at the heart of every high school science course are laboratory activities through these activities students interact with the course content in a way that provides meaningful actions to add to their overall learning experience however at times the content in physics courses

becomes difficult to replicate in a typical high school laboratory by using phet interactive simulations teachers around the world are able to add hundreds of new learning opportunities to their classrooms in just a few clicks of a mouse the simulations can be an effective way to provide high level physics instruction to a diverse population of students using two particular phet simulations the collision lab and masses and springs it was shown how simulations can not only take the place of some laboratory activities but enhance the ability for students to achieve learning outcomes
