while denis summers smith s monograph the sparrows presented his knowledge of sparrow biology this volume tells the other human side of the tale denis summers smith first took up the study of the house sparrow in 1947 thinking that the difficulties of travel in post war britain would best suit the study of a species always close at hand the humble house sparrow common everywhere was surprisingly poorly researched and his work soon provided interesting insights into this successful and adaptable little bird as new opportunities to travel opened up his interest blossomed to take in the genus passer as a whole his travels would ultimately lead to his study of all but one of the group found only in deepest turkestan and to the publication of his authoritative monograph on sparrows in 1988 his wry descriptions of the tribulations and unexpected pleasures of a traveller on four continents from the himalayas and thailand to africa and the americas with a good few islands in between are interspersed with observations and speculations on the biology of sparrows in a wide variety of habitats everywhere local officials and bird watchers warmed to the eccentric scot in pursuit of the little birds that nobody notices but which so often make their homes beside us the author s own photographs and delightful cartoons by euan dunn further paint the picture of this lifelong search

after the chicken the house sparrow is the most widely distributed bird species in the world occurring on all continents except antarctica and on most human inhabited islands although its latin name is passer domesticus it is certainly not domesticated in fact it is widely regarded as a pest species and is consequently not protected in most of its extensive range this combination of ubiquity and minimal legal protection has contributed to its wide use in studies by avian biologists throughout the world the purpose of this book is to review and summarize the results of these global studies on house sparrows and to provide a springboard for future studies on the species house sparrows have been used to study natural selection in introduced species

circadian rhythms and the neuroendocrine control of the avian annual cycle one current question of considerable interest concerns the catastrophic house sparrow population declines in several urban centers in europe is the house sparrow a contemporary canary in the mine other topics of broad interest include the reproductive and flock foraging strategies of sparrows and sexual selection and the function of the male badge in the species anderson also explores the role of the house sparrow in disease transmission to humans and their domesticated animals

this is the final volume in the birds of africa series looking at the rich avifauna of the world s second largest continent volume vii treats the remainder of the passerine families of africa and various offshore islands covering the sparrows weavers whydahs waxbills finches and buntings
