knowledge based systems are increasingly found in a wide variety of settings and this handbook has been written to meet a specific need in their widening use while there have been many successful applications of knowledge based systems some applications have failed because they never received the corrective feedback that evaluation provides for keeping development focused on the users needs in their actual working environment this handbook provides a conceptual framework and compendium of methods for performing evaluations of knowledge based systems during their development its focus is on the users and subject

matter experts evaluation of the usefulness of the system and not on the developers testing of the adequacy of the programming code the handbook permits evaluators to systematically answer the following kinds of questions does the knowledge based system meet the users task requirements is the system easy to use is the knowledge base logically consistent does it meet the required level of expertise does the system improve performance the authors have produced a handbook that will serve two audiences a tool that can be used to create knowledge based systems practitioners developers and evaluators and a framework that will stimulate more research in the area academic researchers and students to accomplish this the handbook is built around a conceptual framework that integrates the different types of evaluations into the system of development process the kinds of questions that can be answered and the methods available for answering them will change throughout the system development life cycle and throughout this process one needs to know what can be done and what can t it is this dichotomy that addresses needs in both the practitioner and academic research audiences

more than 700 sets and 80 000 cards in the three most common grades of preservation for professional regional olympic international and collegiate basketball issues make this book the mvp of any card collector rookie cards errors variations and histories of each card set round out this collector winner

starting with the decision to give an anaesthetic the book goes from the preoperative assessment and preparation of the patient through care and monitoring during anaesthesia to recovery of the patient and the environmental hazards of the anaesthetist this book provides a clinical common sense guide to the parameters of the standard of patient care to which every anaesthetist should aim
