this work investigates the close relationship between language and culture it explains key concepts such as social context and cultural authenticity using insights from fields which includes linguistics sociology and anthropology

the book presents a new theory of the relationship between language and culture in a transnational and global perspective

the fundamental view is that languages spread across cultures and cultures spread across languages or in other words that linguistic and cultural practices flow through social networks in the world along partially different paths and across national structures and communities

this is a core introduction to the most innovative and influential writings to have shaped and defined the relations between language culture and cultural identity

politics language and culture are three of the most powerful forces affecting education today yet they have been little discussed in relation to systemic school reform the new status quo of urban schools this book looks at their effects through the eyes of teachers administrators and insider outsiders who are actually living reform at the school level in four widely different urban school systems chicago san francisco and oakland california and boston the book also creates a statistical and conceptual picture of urban education and school reform as national phenomena with deep historical roots and offers a composite case study of an urban elementary school undergoing reform the author argues that urban school reform is failing because its basic strategy is misguided and because reform thinking has consciously ignored three essential sources of knowledge about school change strategically efforts for reform have relied heavily on the widespread replication of nationally promoted exemplary programs this approach assumes that local schools lack the knowledge and will to solve their own problems and require prescriptive intervention from national models in fact the exemplary programs approach has yielded very limited success what is needed instead is the creation and long term support of unique local exemplary contexts that combine best practice approaches with local knowledge conditions and resources

language not only expresses identities but also constructs them starting from that point language and identity examines the interrelationships between language and identities it finds that they are so closely interwoven that words themselves are inscribed with ideological meanings words and language constitute meanings within discourses and discourses vary in power the powerful ones reproduce more powerful meanings colonize other discourses and marginalize or silence the least powerful languages and cultures language and culture death occur in extreme cases of marginalization this book also demonstrates the socio economic opportunities offered by language choice and the cultural allegiances of language where groups have been able to create new lives for themselves by embracing new languages in new countries language can be a double edged sword of opportunity and marginalization language and identity argues that bilingualism and in

some cases multilingualism can both promote socio economic opportunity and combat culture death and marginalization with sound theoretical perspectives drawing upon the work of bakhtin vygotsky gumperz foucault and others this book provides readers with a rationale to redress social injustice in the world by supporting minority linguistic and cultural identities and an acknowledgement that access to language can provide opportunity

this state of the art exploration of language culture and identity is orchestrated through prominent scholars and teachers narratives each weaving together three elements a personal account based on one or more memorable or critical incidents that occurred in the course of learning or using a second or foreign language an interpretation of the incidents highlighting their impact in terms of culture identity and language the connections between the experiences and observations of the author and existing literature on language culture and identity what makes this book stand out is the way in which authors meld traditional academic approaches to inquiry with their own personalized voices this opens a window on different ways of viewing and doing research in applied linguistics and tesol what gives the book its power is the compelling nature of the narratives themselves telling stories is a fundamental way of representing and making sense of the human condition these stories unpack in an accessible but rigorous fashion complex socio cultural constructs of culture identity the self and other and reflexivity and offer a way into these constructs for teachers teachers in preparation and neophyte researchers contributors from around the world give the book broad and international appeal

language our primary tool of thought and perception is at the heart of who we are as individuals languages are constantly changing sometimes into entirely new varieties of speech leading to subtle differences in how we present ourselves to others this revealing account brings together eleven leading specialists from the fields of linguistics anthropology philosophy and psychology to explore the fascinating relationship between language culture and social interaction a range of major questions are discussed how does language influence our perception of the world how do new languages emerge how do children learn to use language appropriately what factors determine language choice in bi and multilingual communities how far does language contribute to the formation of our personalities and finally in what ways does language make us human language culture and society will be essential reading for all those interested in language and its crucial role in our social lives

includes brief mention of aboriginal languages and culture

this collection of 64 papers by contributors throughout the world presents work from a variety of fields primarily indo european linguistics and philology and thus reflects the broad interests of edgar c polomé

in this book andrew j strathern and pamela j stewart delineate the relationship between language in particular and culture in general by focusing on language as both social practice and a means of classifying and interpreting the world a traditional linguistic approach to a focus on language is illuminated by their anthropological emphasis on the embodiment of relationships and experience in the book the body is placed in the foreground for understanding language in culture which helps in turn to understand how it enables us to adapt to the world of lived material experience written in an accessible style and drawing on an extensive corpus of primary field research from papua new guinea samoa japan taiwan scotland and ireland strathern and stewart present a world anthropology which links together european north american and asia pacific approaches to the topic students and scholars alike of sociocultural anthropology linguistic anthropology and linguistics will benefit from this engaging work on how the various components of our culture are informed and shaped through language

this collection of thirteen essays examines sociolinguistic phenomena in a wide variety of marginal environments providing both an overview of globalizaiton on the margins and a foundation for an expanded understanding of the processes of linguistic and cultural changes at work in these settings taking an expansive conceptual view of margins the volume is organized in three parts looking at examples of marginal spaces in the nation state in online environments and in the peripheries of urban locations globally to call attention to new and changing discursive genres patterns practices and identities emerging in these spaces as a result of contemporary mobilities the evolving global economy and socio political changes with previous research previously confined to the study of globalization in urban areas this volume opens the door for further research on the complex sociolinguistic processes resulting from globalization on the margins making this an ideal resource for students and scholars in sociolinguistics globalization and heritage studies new media anthropology and cultural studies the open access version of this book available at taylorfrancis com has been made available under a creative commons attribution cc by

how do we make sense of our experience in order to understand how we construct meaning the varied and complex relationships among language mind and culture need to be understood while cognitive linguists typically study the

cognitive aspects of language and linguistic anthropologists typically study language and culture language mind and culture is the first book to combine all three and provide an account of meaning making in language and culture by examining the many cognitive operations in this process in addition to providing a comprehensive theory of how we can account for meaning making language mind and culture is a textbook for anyone interested in the fascinating issues surrounding the relationship between language mind and culture further the book is also a practical introduction most of the chapters include exercises that help the student understand the theoretical issues no prior knowledge of linguistics is assumed and the material is accessible and useful to students in a variety of other disciplines such as anthropology english sociology philosophy psychology communication rhetoric and others language mind and culture helps us make sense of not only linguistic meaning but also of some of the important personal and social issues we encounter in our lives as members of particular cultures and as human beings
