every year billions of animals are raised and killed by human beings for human consumption what should we think of this practice in what ways if any is it morally problematic this volume collects twelve new essays by leading moral philosophers examining some of the most important aspects of this topic

the world's most comprehensive well documented and well illustrated book on this subject with extensive subject and geographic index 48 photographs and illustrations mostly color free of charge in digital pdf format

describes how genetic engineering works as well as the problems and solutions it offers

the book answers 10 questions addressed to the author in various forms some are personal while others relate to global issues all are answered with candor and detailed explanation the answers will not suit those who seek confirmation of popular viewpoints nor will they suit those who insist they are doing good without having knowledge of what they are really doing but they will admirably suit those extremely important persons from all walks of life who are open to new knowledge who can accept challenges to their beliefs and received knowledge the answers cover such topics as why livestock are critical to food security why free trade and markets can't solve food shortages why aid shouldn't insist poor countries follow our model how to reconcile science and commerce with popular ideals how gross domestic happiness can be a serious topic how more food can be produced with less land and fertilizer why labels like buddhist and vegetarian confuse life what traditional wisdom is critical to development how misrepresentation fuels fears about climate change why small farmers and foreign agribusiness must coexist

the thirteen essays in this volume explore for the first time the possible skeptical implications of disagreement in different areas and from different perspectives with an emphasis in the current debate about the epistemic significance of disagreement they represent a new contribution to the study of the connection between disagreement and skepticism in epistemology metaethics ancient philosophy and metaphilosophy

agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years this thoroughly revised and amended edition of paul b thompson's path breaking study of ethical and philosophical issues raised by this technology up to date the original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world the new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the precautionary principle and the transatlantic debate between united states and european perspectives on biotechnology thompson's unique and insightful approach to addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological innovation and social change the book should be of interest to scholars and citizens interested in the internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in

the transformation of the global food system

after an introduction to the nature of the debate by editor steve f sapontzis seven sections examine the finer points of the subject the first section reviews the history of vegetarianism the discussion in the second section highlights the health issues and what anthropology has to tell us about human diet section three includes classic cases for and against vegetarianism and new essays rebutting these classic arguments the fourth section examines religious teachings about eating animals drawn from judaism christianity and islam as well as native american and eastern traditions finally in the last three sections the authors debate the ethics of eating meat in connection with feminism environmentalism and multiculturalism

in its role as a scriptural charter vinaya has justified widely dissimilar approaches to religious life as buddhist orders in different times and places have interpreted it in contradictory ways in the resulting tension between scripture and practice certain kinds of ceremonial issues such as those involving lineage seniority initiation purification repentance visualization vows ordination acquire profound social psychological doctrinal and soteriological significance in buddhism going forth focuses on these issues over a wide sweep of history from early fifth century china to modern japan to provide readers with a rich overview of the intersection of doctrinal ritual and institutional concerns in the development of east asian buddhist practices despite the crucial importance of vinaya especially for understanding buddhism in east asia very little scholarship in western languages exists on this fascinating topic the essays presented here written by senior scholars in the field go beyond the timeworn method of relying on prescriptive accounts in the scriptures to describe what imaginary buddhists must have done or do rather they address how actual peo
